

Process Control Specialist

Hulamin is looking for a suitably qualified and experienced **Process Control Specialist** to join the Process Engineering department. This position is based in Hulamin Operations Pietermaritzburg.

The core responsibilities of the position include:

- Develop and implement systems to improve plant performance.
- Project management
- Lead process improvement initiatives.
- Support process teams on process related challenges / projects.
- Lead yield / recovery improvement projects.
- Improve Process Control systems within manufacturing areas.
- Apply statistical/machine learning techniques to enhance process/business performance.

The requirements for the position include:

- BSc/BEng Engineering/Physics / other relevant qualification
- Six Sigma qualification is advantageous.
- Relevant process experience and proven past performance in a manufacturing environment is essential.
- Experience in an analytical language (e.g., Python, R, Julia)
- Knowledge and track record of Project Management methodologies
- A proven quantitative and fact-based approach to fault finding and troubleshooting.
- Knowledge and practical experience using Process Control methodologies.

Other competencies

- An analytical, innovative and hands on work style and the ability to interact with a diverse multi skilled team.
- Must be results driven and capable of working independently.

Interested applicants are encouraged to apply for this exciting opportunity by emailing their CV to HRRecruitment7@hulamin.co.za

Candidates who do not receive any correspondence within 1 month after the closing date may assume that their applications were unsuccessful and are hereby thanked for applying.
